

ZIRON LIGHT

Verse 1:

**Earth has become too small
With the cities way too tall
The air is hard to breathe
There's nothing left to feed
We betake ourselves to flight
There is no hope in sight
A better place we seek
Deep in the galaxy**

Refrain:

**Ziron light, lighting up our night
Star of a dazzling whiteness
Show us the way through darkness
Keep us on track so that we never loose our way**

Verse 2:

**A place like earth we found
We are happy all around
Clear water and fresh air
Pure nature everywhere
We got our second chance
For mankind to advance
Don't make the same mistakes
No matter what it takes**

Refrain:

**Ziron light, lighting up our night
Star of a dazzling whiteness
Show us the way through darkness
Keep us on track so that we never loose our way**
